

enomatic™ windows based software was created to effectively manage your wine card systems.

Enowriter Basic Software

Card management software that allows users to create:

- *Deductive wine cards*
- *Technical cards to access bottles*
- *Service cards*

Ideal for smaller wine card systems.

Requires a Client (PC) with Windows XP Professional or newer and internet access (not included).

Enosoft Professional Software

Complete wine card and active inventory management. Models are networked together and controlled from a single computer.

Gathers consumption based statistics to assist in target marketing and sales promotions.

Create multiple and advanced Wine Card types including:

- *Deductive User, Loyalty, and Limitation cards*
- *Accumulative VIP and Restaurant cards; and*
- *Technical Service cards*

Requires Enobox Server and an internet connection.
