enomatic™  
wine serving systems

## enoline 4

All Enomatic™ models are elegantly designed in stainless steel and are equipped with 1 or 3 customized serving portions.

At a depth of only 8 inches, the Enoline is a self contained system that can fit on any counter or back bar.

enoline comes in room temperature or refrigerated to control your wines' temperature.

**Enoline 4 - Room Temperature**  
Length: 20.9 in  
Width: 7.9 in  
Height: 24.9 in  
Weight: 55 lbs

**Enoline 4 - Refrigerated**  
Length: 29.5 in  
Width: 7.9 in  
Height: 24.9 in  
Weight: 88 lbs  
Electric: 110 volts

Enomatic™ systems are built with state-of-the-art technology that utilizes inert gas (Argon or Nitrogen) to preserve the integrity of a wine for up to 30 days.

Through minimized piping, Enomatic™ assures only the freshest wine delivered directly from the bottle with auto-cleaning after each use.

Length: 36.2 in  
Width: 7.9 in  
Height: 24.9 in  
Weight: 64 lbs  
Electric: 110 volts

## Wine Card Systems

With the use of Enomatic™'s signature Wine Card system, each unit can become a self service wine tasting station

Simply by...

...inserting a card,  
...selecting a wine and portion desired,  
...and pressing a button  
you can serve or taste any wines desired!

The Wine Card activation provides complete transaction control on the accessibility of product for waiters or staff and offers ideal self-service options for customers who can select and pay for the wines they prefer.

Wine Cards can be customized with your brand or design to market you establishment or related products.

Wine Card systems require the use of Enowriter or Enosoft Professional operating software.

## Operating Software

Enomatic™ windows based software was created to effectively manage your wine cards and wine card system.

## Enowriter Software

This card management software allows users to create deductive wine cards and technical/service cards for the Enomatic™ system.

Enowriter is a great solution for customers utilizing smaller systems or already have an advanced inventory management and POS systems in place.

Simply create a line item in your POS and when a customer purchase a card, apply the desired value on the card.

For additional wine and transaction management, try Enosoft Professional.

Requires a Client (PC) with Windows XP Professional or Newer and Internet Access (not included).

## Enosoft Professional Software

Alternatively, **Enosoft Professional** allows complete system and management control by networking your Enomatic™ models together.

Controlled from a computer (not included) located near the system or wirelessly in a back office, Enosoft allows users to manage wine cards and active wine inventory, track customer and staff transactions, and use consumption based statistics to assist in target marketing and sales promotions.

Enosoft also permits the creation of multiple Wine Card Types including: **deductive** User cards and Loyalty Cards, **accumulative** VIP and Restaurant cards, and Technical Service cards.

The software uses a secured database Enobox server, connected to the Internet, that provides sophisticated *real-time* monitoring and technical support and updates.

Vista Compatible
